

# Contract Management in High Consequence Organisations

## Training Overview

### Introduction

Patterns of increased outsourcing within high consequence sectors impose a corresponding duty to effectively manage the supply chain in a rigorous and systematic manner in order to maximise contract performance and reduce risk to the business and its people.

Developed specifically for these sectors, this course recognises the challenges created by historical influences, and seeks to address many misconceptions, customs and practices which are still wide spread across industry. This in turn helps avoid many of the pitfalls that can lead to disaster. This highly bespoke course delivers an in depth knowledge of the cradle to grave process of Contract Management and how to get best value from our contractors.

### Course objectives

The course is made up of 7 modules and provides a comprehensive syllabus that holistically covers all aspects of the Contract Management cycle. It includes roles and responsibilities of managers, legal, commercial, procurement and Health Safety and Environmental impacts of contracts on your business.

### Who should attend?

This course is designed for all stakeholders with roles/responsibilities within the Contract Management process.

### Course duration

This is a 3 day course which is assessed.

### Course preparation

A basic awareness and understanding of the organisations business processes relating to procurement and supply chain management.

### Course reference materials

Copies of the course training manual will be provided and delegates will receive a certificate of competence upon successful completion.
